ARSLANTÜRK  
YAPI

As the EPSBLOCK family, we aimed to offer people more comfortable living spaces on the path we set out on in 2011. We wanted to show them that the comfort they dream of is not impossible. As a result of our R&D studies, market research, and product trials, we have achieved our goals with sure steps. By eliminating the use of different materials and different application requirements for each problem, we have solved many problems with a single product.

### Epsblocks, Wall Panels, Insulation Blocks, Construction Chemicals

MRT Yapi was established in January 2017 in order to provide a new face to the sector and offer alternative solutions to consumers. By combining an experienced staff with talented people, it has started to communicate with the countries of the near geography and has become a preferred brand in a short time. MRT Yapi has developed rapidly because of the innovative company profile and solutions provided to customer problems. As a result of this development, it acquired the Alfill brand in June 2017. In 2019, it acquired Alfill Factory in order to bring the solutions it brought to the sales network to the production line and to offer more innovative and technological solutions. It renewed its R & D and production lines. With the sand screening, stone dust blasting facilities and the renewal of the existing machines, the factory increased its monthly production to 5,000 tons. It has managed to add new products to its product range. MRT Structure Factory, which has become one of the biggest manufacturers in the sector, manufactures not only for Alfill brand but also for many brands in the sector.

Yavuz Cam started its commercial activities with retail glass sales in 1970 and continued this activity until 1995. Having obtained the distributorship of Şişecam in 1976, the company has also started wholesale glass sales since that date. The company which opened its production facility in Arsin Organized Industrial Zone / Trabzon in 1992 started to produce heat-insulated glass in 1994 and became one of Şişecam's Authorized Isıcam Manufacturer (IYÜ) companies. The company also held the Plaspen and Rehau dealerships between 1997-2007 and engaged in plastic joinery activities. Yavuz Cam is one of the first technological facilities in the Eastern Black Sea region in the glass industry and closely follows the technological developments in the glass industry. In this direction, 2 glass tempering lines were established in 2007 and 2014. Temper furnaces can temper Low-E glasses with high energy efficiency. As a result of the dealership system revised throughout the country by Şişecam in 2015, the company was determined as the only authorized wholesale glass dealer in the Eastern Black Sea region. The company which always prioritizes high-quality production and service also gives great importance to customer satisfaction and customer focus. It aims to increase the quality and comfort of the end consumer's living standards by producing the glass groups with high energy-efficiency. Yavuz Cam which includes various glass groups applied in residences, commercial and architectural buildings in its product portfolio has adopted the principle of being reliable and creating added value for its solution partners, customers and employees.
